

ZSOLT BARANYAI

PROFIL

With his double-degree in Mechatronics Engineering and Finance and Accounting, Zsolt represents interdisciplinarity in the realm of decision support. His personal interest lies in practical linking of engineering and economics whenever possible in order to improve business performance and optimise processes regardless of industrial area.

ENGINEERING	ECONOMICS
Supply chain	Reporting
Decision making	
Production planning	Data mining
Mechatronics	Controlling

- In relationship
- English, German

EXPERIENCE

As a business developer, former senior data analyst, consultant and research scientist in production and supply chain, Zsolt is familiar to applied statistical tools and has practical production optimisation experience from many industrial segments. Besides, he is a director of a family company for accounting and office automation. He is especially interested in production optimisation and advanced decision support.
